TEST EXECUTION REPORT					
Status	PASS	FAIL	Not Executed	Out Of Scope	Total TC
Test Case (Master)	6	3	2	2	13
Grand Total	6	3	2	2	13

Application Type	New Features	Automation scripts	Result : Pass-6 Fail-3 Not Executed-2 Out of scope- 2
Web application	N/A		
Testing Environment	Testing Scope		
Production Enviroment			

LIMITATIONS				
Documents			Received	Useful
PRD			No	No
USER STORY			No	No

	Testing Type in Scope	Description
Yes/ No. Justification (If No):	Functional Test	This type of testing ignores the internal parts and focuses only on the output to check if it is as per the requirement or not.
Yes/ No. Justification (If No):	Integration Testin	Testing of all integrated modules to verify the combined functionality after integration is termed as Integration Testing.
Yes/ No. Justification (If No):	Negative Testing	Testing having the mindset of "attitude to break" using incorrect data and invalid inputs.
Yes/ No. Justification (If No):	Jsability Testing	Test application from user friendliness perspective.
Yes/ No. Justification (If No):	Browser Compatibility Testing	Browser Compatibility Testing is performed for web applications and it ensures that the software can run with the combination of different browser and operating system. This type of testing also validates whether web application runs on all versions of all browsers or not.
Yes/ No. Justification (If No):	Boundary Value Testing	There is an upper and lower boundary for each range and testing is performed on these boundary values.
Yes/ No. Justification (If No):	Risk Based Testing Or Regression Testing	which has the highest impact on business and in which the probability of failure is very high. Testing an application as a whole for the modification in any module or functionality is termed as Regression Testing.
